Skills

Front-end - HTML, CSS, jQuery, JavaScript, React

Back-end - Node, Express, MongoDB, MySQL

Projects

Covid-19 Tracker

Fall 2020

- Constructed a Covid-19 tracker application that displays data for live cases, recovered cases, and deaths.
- Combined APIs from React-Leaflet and Chart.js to visualize data for each case.

Hi Ho

Summer 2020

- Created a job search application that provides the cost of living expenses for the job location selected allowing the applicant to make an informed decision about the job.
- Integrated APIs from ZipRecruiter, Numbeo, and the backend to display job application and cost of living data.

Smasual

Summer 2020

- Developed a simple dating app that allows users to specify criteria to find potential dates using zip codes.
- Engineered logic that associated a user's information to their profile and built user email functionality.

Travel Nurses Job Spot

Spring 2020

- Designed an application for travel nurses that compares the location, compensation, and cost of living for the selected cities.
- Established logic to retrieve data from APIs using AJAX and rendered data on the browser using jQuery.

Experience

Johnson & Johnson

Wellness Program Manager

Milpitas, CA

Apr. 2020 – Sept. 2020

- Managed a wide variety of corporate wellness programs and events. Ensured all program deliverables were fulfilled.
