SUMMARY

An engineer that is extremely motivated and passionate to further my skills in front end development. Very hard working, excellent communicator and collaborative skills, and can accomplish any task given. A graduate from U.C. Berkeley Extension with a Certificate in Full Stack Web Development.

TECHNICAL SKILLS

Languages & Tools: HTML, CSS, JavaScript, jQuery, React, Redux, GraphQL, Apollo, Node, Express, MongoDB, MySQL, Git

PROJECTS

League Stats | **GitHub:** <https://bit.ly/3ccF9EZ> | **Deployed Project:** <https://league-stats.com>

- Produced a League of Legends application to visualize stats of summoners and information about the game.
- Formed logic utilizing the Riot APIs to showcase data to the user interface.
- Technologies: React, Redux, Express.js, Node.js

Covid-19 Tracker | **GitHub:** <https://bit.ly/3s5lxK7> | **Deployed Project:** <https://bit.ly/3iqcglk>

- Constructed a Covid-19 tracker application that displays country data for live cases, recovered cases, and deaths.
- Combined logic from React-Leaflet and Chart.js to visualize data for each country.
- Technologies: React, React-Leaflet, Chart.js

Hi Ho | **GitHub:** <https://bit.ly/3bp2S67> | **Deployed Project:** <https://bit.ly/38hZNCB>

- Created a job search application that provides the cost of living expenses for the job location selected allowing the applicant to make an informed decision about the job.
- Integrated APIs from ZipRecruiter, Numbeo, and the backend to display job applications and cost of living data.
- Technologies: MongoDB, Express.js, React, Node.js, Material-UI

EXPERIENCE

Trilogy Education Services

Berkeley, CA

Teaching Assistant, Full Stack Web Development

July 2021 - Present

- Supported students in building web applications using the MERN stack by helping them understand web development fundamentals and technologies.
- Led and guided students on solving coding questions during group activities in class.

Ezer

San Jose, CA

Software Engineer

June 2021 - Present

- Developed full stack features using React, Redux, and Node/Express/MongoDB in a startup environment.
- Built dynamic UI components and implemented features such as infinite scrolling, drag-n-drop, filtering, and conditional rendering.
- Integrated numerous REST APIs and services for reliable and secure data transfer between the client and server.

EDUCATION

Full Stack Web Development Certificate: University of California, Berkeley

Berkeley, CA

M.S. in Exercise Physiology: University of Tennessee, Knoxville

Knoxville, TN

B.A. in Psychology: University of Tennessee, Knoxville

Knoxville, TN
